GPT 6 document reconciliation

First response table from synthetic workshop records A and B

Eight differences are identified: a quarter change, a removed qualification, one deletion, one addition, one entry movement, a rental amount change, an adjustment sign change and a currency change. Paper stock and volunteer count remain unchanged. No total across currencies is calculated.

ID	Location	Before	After	Difference type	Practical interpretation
P01	A entry 1 / TXT line 2 → B entry 1 / TXT line 2	Reporting period: Q2 2026.	Reporting period: Q3 2026.	Time period	The reporting quarter changes from Q2 to Q3 in the same year; do not compare these as the same period.
P02	A entry 2 / TXT line 3 → B entry 2 / TXT line 3	The workshop serves up to 24 participants, subject to venue approval.	The workshop serves up to 24 participants.	Condition removed	The 24-person upper limit stays, but the venue-approval qualification is absent in B. This does not prove approval was obtained.
P04	A entry 4 / TXT line 5 → absent in B	Use the east entrance for the supply delivery.	Absent	Deletion	B no longer specifies the east entrance for delivery. No replacement entrance is stated.
P05	A entry 5 / TXT line 6 → B entry 3 / TXT line 4	After P04 and after P03	Immediately after P02 and before P03	Single entry movement	The disposal-approval requirement is textually unchanged. Count one move of P05 before P03, not a second independent move for the resulting position change of P03.
P06	Absent in A → B entry 5 / TXT line 6	Absent	Record the emergency contact number at reception.	Addition	B adds a requirement to record the emergency contact number at reception.
T01	A and B entry 6 / TXT line 7	Room rental: USD 1,200.00	Room rental: USD 1,250.00	Number change	The stated rental rises by USD 50.00.
T02	A and B entry 7 / TXT line 8	Refund adjustment: USD -75.00	Refund adjustment: USD 75.00	Sign change	The adjustment switches from negative to positive; the signed numerical difference is +USD 150.00. The records do not explain the accounting intent.
T03	A and B entry 8 / TXT line 9	Equipment deposit: USD 300.00	Equipment deposit: EUR 300.00	Currency unit change	The face amount remains 300.00 but the currency changes. Its value difference cannot be calculated without an exchange-rate basis.

Unchanged controls

T04 | A and B entry 9 / TXT line 10 | Paper stock: USD 90.00
T05 | A and B entry 10 / TXT line 11 | Volunteer count: 4

P03 wording is unchanged; its displacement is accounted for by the single P05 movement. P05 wording is unchanged. Locations exclude DOCX title/preamble; TXT line references include its one-line preamble.

Unresolved: The reason for each revision and which record is authoritative are not supplied. No exchange rate, valuation date or conversion policy is supplied for the currency change. The documents do not establish whether venue approval occurred or why the refund sign changed. The final order supports the single-move description for P05, but does not reveal the historical editing actions.

Evidence visualization of a preserved model response, not a ChatGPT interface screenshot. Full first response and machine-readable data are supplied alongside this rendering.
